

TalentIQ AI Recruitment Report

Job Description

Job Title: Machine Learning Engineer Location: Bengaluru, India Experience Required: 2–5 Years
Job Summary: We are looking for a passionate Machine Learning Engineer to join our AI team. The ideal candidate should have strong experience in Python, Machine Learning, Deep Learning, Data Analysis, and Cloud deployment. The candidate should be capable of developing, training, evaluating, and deploying ML models into production. Key Responsibilities: • Build and deploy Machine Learning models for real-world applications. • Develop data preprocessing and feature engineering pipelines. • Train and optimize classification and regression models. • Work with TensorFlow, PyTorch, or Scikit-learn. • Deploy AI models using FastAPI, Flask, or Docker. • Collaborate with software engineers and data scientists. • Create REST APIs for model inference. • Monitor model performance and improve accuracy. Required Skills: • Python • Machine Learning • Deep Learning • TensorFlow • PyTorch • Scikit-learn • Pandas • NumPy • SQL • FastAPI • Flask • Docker • Git • Linux • REST APIs Preferred Skills: • AWS, Azure, or Google Cloud • Kubernetes • MLOps • CI/CD • Hugging Face • NLP • Computer Vision • LangChain • LLMs • Vector Databases Qualifications: • Bachelor's or Master's degree in Computer Science, AI, Data Science, or related field. • Strong understanding of machine learning algorithms. • Experience working with real-world datasets. • Good communication and teamwork skills. • Knowledge of software engineering best practices. Preferred Projects: • Resume Screening System • Recommendation System • Image Classification • Object Detection • NLP Chatbot • Predictive Analytics • Medical AI

Candidate Rankings

1. Priya_Verma.pdf

Overall Score : 83

Skill Match : 85%

Recommendation : Recommended

AI Feedback

Priya Verma is a strong candidate with a solid background in Python and Machine Learning, and relevant experience in data analysis. However, she lacks experience in Deep Learning and Cloud deployment, and needs to develop skills in areas such as TensorFlow, PyTorch, and software engineering best practices. With some additional training and experience, Priya has the potential to excel as a Machine Learning Engineer.

Strengths

- Strong foundation in Python and Machine Learning
- Experience in data analysis and dashboard creation
- Relevant projects such as House Price Prediction and Customer Segmentation

Weaknesses

- Lack of experience in Deep Learning and Cloud deployment
- Limited knowledge of software engineering best practices

Missing Skills

- TensorFlow
- PyTorch
- FastAPI
- Docker
- Git
- Linux
- REST APIs

2. Rahul_Sharma.pdf

Overall Score : 83

Skill Match : 85%

Recommendation : Recommended

AI Feedback

Rahul Sharma is a strong candidate for the Machine Learning Engineer position, with excellent technical skills and a proven track record of building and deploying production ML pipelines. However, he lacks experience with some of the required skills, such as Scikit-learn and SQL. With some additional training and experience, he has the potential to excel in this role.

Strengths

- Strong experience in Python, Machine Learning, and Deep Learning
- Proven track record of building and deploying production ML pipelines
- Excellent technical skills in TensorFlow, PyTorch, and AWS

Weaknesses

- Lack of experience with Scikit-learn, Pandas, and NumPy
- No mention of knowledge of software engineering best practices

Missing Skills

- Scikit-learn
- Pandas
- NumPy
- SQL
- FastAPI
- Flask
- Git
- Linux

3. Aman_Gupta.pdf

Overall Score : 49.5

Skill Match : 40%

Recommendation : Not Recommended

AI Feedback

Aman Gupta's resume shows some potential, but lacks the necessary technical skills and experience required for the Machine Learning Engineer role. With additional training and experience, Aman may be a strong candidate in the future. Currently, Aman would be a weak match for this position.

Strengths

- Basic understanding of HTML, CSS, and MS Excel
- Completion of a portfolio website project
- Bachelor's degree in Computer Applications

Weaknesses

- Lack of experience in machine learning and deep learning
- Insufficient technical skills required for the job

Missing Skills

- Python
- Machine Learning
- Deep Learning
- TensorFlow
- PyTorch
- Scikit-learn
